GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 2008 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 2009. The March 10, 2009 Final Grape Crush Report will contain any late reports or corrections to the preliminary report. **Please notify us of any corrections for the Final Grape Crush Report by February 20, 2009.**

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2008 crush totaled 3,665,375 tons, down less than 1 percent from the 2007 crush of 3,674,453 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,709,040 tons, down 9 percent from 2007. The 2008 white wine variety crush totaled 1,345,112 tons, down 2 percent from 2007. Tons crushed of raisin type varieties totaled 494,124, up 36 percent from 2007, and tons crushed of table type varieties totaled 117,099, up 85 percent from 2007. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2008 season, this total was 747,925 tons, approximately 20 percent of the 2008 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2008 for red wine, white wine, raisin and table grapes that were, on average, above the 2007 prices. The 2008 average price of all varieties was \$544.18, up 4 percent from 2007. Average prices for the 2008 crop by type were as follows: red wine grapes, \$642.87, up 3 percent from 2007; white wine grapes, \$538.74, up 12 percent from 2007; raisin grapes, \$224.02, up 44 percent; and table grapes, \$189.27, up 37 percent. These price levels have not been adjusted for inflation.

CALIFORNIA GRAPE CRUSH TONNAGE AND PRICE, 1988-2008

| Crop Year | Red Wine Type | | White Wine Type | | Total Wine Type | | Raisin Type | | Table Type | | All Types | |
|-----------|---------------|--------|-----------------|--------|-----------------|--------|---------------|--------|---------------|--------|---------------|--------|

LEADING GRAPE VARIETIES AND DISTRICTS

In 2008, Chardonnay accounted for the largest percentage of the total crush volume with 15.4 percent. Thompson Seedless accounted for the second leading percentage of crush with 11.9 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties.

District 13, (Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)), had the largest share of the state's crush, at 1,473,673 tons. The average price per ton in district 13 was \$251.19.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,390.64 per ton, up 4 percent from 2007. District 3 (Sonoma and Marin counties) received the second highest return of \$2,235.30, up 7 percent from 2007. The 2008 Chardonnay price of \$815.00 was up 14 percent from 2007, and the Cabernet Sauvignon price of \$1,098.47 was up 11 percent from 2007. The 2008 average price for Zinfandel was \$459.53, down 2 percent from 2007, while the Merlot average price was up 9 percent from 2007 at \$646.52 per ton.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2008 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2007 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2008 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2007 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2008 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2007 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2008 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2007 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2008 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2007 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2008 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2007 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2009 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The next example indicates the method used for calculating weighted averages.

The following two purchases were made.

| Variety | District | Tons | Degrees Brix | Base Price | Price Paid Per Ton | Acceptable Brix Limits | Brix Adjustment Factors | Brix Adjustment Limits |
|--------------|----------|-------|--------------|------------|--------------------|------------------------|-------------------------|-------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | \$450.00 | \$364.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |
| Petite Sirah | 1 | 20.5 | 19.0 | \$450.00 | \$418.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |

Note: The variety, district, base price, and Brix Adjustment Factors (including Brix limits) are the same. The tons purchased, degrees Brix, and price paid per ton are the only differences in this example.

Step 1: Multiply the tons by the Brix for each lot purchased and then add the products to get the total. Also, add the tons purchased.

| Variety | District | Tons | Degrees Brix | Total (Tons X Brix) |
|---------------|----------|-------|--------------|------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | 155.5 X 20.6 = 3,203.3 |
| Petite Sirah | 1 | 20.5 | 19.0 | 20.5 X 19.0 = 389.5 |
| TOTALS | | 176.0 | | 3,592.8 |

Step 2: Divide the total (3,592.8) by the total tons purchased (176.0) to get the **Weighted Average Degrees Brix**.

$$\frac{3,592.8}{176.0} = 20.4$$

Step 3: Multiply the purchased tons by the Price Paid Per Ton for each lot purchased and then add the products to get the total.

| Variety | District | Tons | Price Paid Per Ton | Total (Tons X Brix) |
|---------------|----------|--------------|--------------------|---------------------------|
| Petite Sirah | 1 | 155.5 | \$364.50 | 155.5 X 364.50 = 56,679.8 |
| Petite Sirah | 1 | 20.5 | \$418.50 | 20.5 X 418.50 = 8,579.3 |
| TOTALS | | 176.0 | | 65,259.1 |

Step 4: Divide the total (65,259.1) by the total tons purchased (176.0) to get the **Weighted Average Price Per Ton**:

$$\frac{65,259.1}{176.0} = \$370.79$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2008 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2007 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2008 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2007 are shown. (*Table 9 only appears in the Final Grape Crush Report.*)

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2008 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2007 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

* Synonyms for variety names are shown on Page 5

a/ See code descriptions in Table 8 - Supplement: 2008 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price.

e/ All prices based on per Degree Brix.

TABLE 8 - SUPPLEMENT: 2008 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2008 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

FEBRUARY 10, 2010

3 1223 08679 0301

THANK YOU!

The California Office of USDA's National Agricultural Statistics Service (NASS) and the California Department of Food and Agriculture (CDFA) appreciate the timely reporting by the State's vintners in preparation of the 2009 Grape Crush Report. This report is available online at:

http://www.nass.usda.gov/Statistics_by_State/California/Publications/Grape_Crush/index.asp

NASS/CDFA also conducts an annual acreage survey in partnership with California grape growers. The Report contains information on new plantings and removals of grapes. The Grape Acreage Report is available on the NASS website at:

http://www.nass.usda.gov/Statistics_by_State/California/Publications/Grape_Acreage/index.asp

GROWERS

AND VINTNERS

Please notify NASS of any crush report corrections by
February 19, 2010.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 2009 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 2010. The March 10, 2010 Final Grape Crush Report will contain any late reports or corrections to the preliminary report. **Please notify us of any corrections for the Final Grape Crush Report by February 19, 2010.**

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2009 crush totaled 4,089,160 tons, up 11 percent from the 2008 crush of 3,673,858 tons. This is only the second time in 10 years that California's crush has exceeded 4 million tons. Red wine varieties accounted for the largest share of all grapes crushed, at 2,073,703 tons, up 24 percent from 2008. The 2009 white wine variety crush totaled 1,623,190 tons, up 21 percent from 2008. Tons crushed of raisin type varieties totaled 307,360, down 38 percent from 2008, and tons crushed of table type varieties totaled 84,907, down 49 percent from 2008. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2009 season, this total was 499,323 tons, approximately 12 percent of the 2009 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

The 2009 average price of all varieties was \$570.64, up 4 percent from 2008. Average prices for the 2009 crop by type were as follows: red wine grapes, \$664.06, up less than 1 percent from 2008; white wine grapes, \$534.65, down 1 percent from 2008; raisin grapes, \$171.02, down 24 percent; and table grapes, \$143.10, down 21 percent. These price levels have not been adjusted for inflation. The large increase in higher priced wine grapes crushed, coupled with the decline in less expensive raisin and table grape varieties crushed, results in the average price increase from 2008.

CALIFORNIA GRAPE CRUSH TONNAGE AND PRICE, 1988-2009

| Crop Year | Red Wine Type | | White Wine Type | | Total Wine Type | | Raisin Type | | Table Type | | All Types | |

LEADING GRAPE VARIETIES AND DISTRICTS

In 2009, Chardonnay accounted for the largest percentage of the total crush volume with 17.8 percent. Zinfandel accounted for the second leading percentage of crush with 10.9 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties, with the exception of Thompson Seedless.

District 13, (Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)), had the largest share of the State's crush, at 1,344,513 tons. The average price per ton in District 13 was \$247.87.

*Synonyms for variety names are shown on Page 5.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,400.85 per ton, down less than 1 percent from 2008. District 3 (Sonoma and Marin counties) received the second highest return of \$2,180.28, down 3 percent from 2008. The 2009 Chardonnay price of \$756.12 was down 7 percent from 2008, and the Cabernet Sauvignon price of \$1,068.23 was down 4 percent from 2008. The 2008 average price for Zinfandel was \$457.11, down 1 percent from 2008, while the Merlot average price was down 4 percent from 2008 at \$624.25 per ton.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2009 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2008 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2009 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2008 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2009 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2008 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2009 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2008 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2009 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2008 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2009 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2008 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2009 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The next example indicates the method used for calculating weighted averages.

The following two purchases were made.

| Variety | District | Tons | Degrees Brix | Base Price | Price Paid Per Ton | Acceptable Brix Limits | Brix Adjustment Factors | Brix Adjustment Limits |
|--------------|----------|-------|--------------|------------|--------------------|------------------------|-------------------------|-------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | \$450.00 | \$364.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |
| Petite Sirah | 1 | 20.5 | 19.0 | \$450.00 | \$418.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |

Note: The variety, district, base price, and Brix Adjustment Factors (including Brix limits) are the same. The tons purchased, degrees Brix, and price paid per ton are the only differences in this example.

Step 1: Multiply the tons by the Brix for each lot purchased and then add the products to get the total. Also, add the tons purchased.

| Variety | District | Tons | Degrees Brix | Total (Tons X Brix) |
|---------------|----------|-------|--------------|------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | 155.5 X 20.6 = 3,203.3 |
| Petite Sirah | 1 | 20.5 | 19.0 | 20.5 X 19.0 = 389.5 |
| TOTALS | | 176.0 | | 3,592.8 |

Step 2: Divide the total (3,592.8) by the total tons purchased (176.0) to get the **Weighted Average Degrees Brix**.

$$\frac{3,592.8}{176.0} = 20.4$$

Step 3: Multiply the purchased tons by the Price Paid Per Ton for each lot purchased and then add the products to get the total.

| Variety | District | Tons | Price Paid Per Ton | Total (Tons X Brix) |
|---------------|----------|--------------|--------------------|---------------------------|
| Petite Sirah | 1 | 155.5 | \$364.50 | 155.5 X 364.50 = 56,679.8 |
| Petite Sirah | 1 | 20.5 | \$418.50 | 20.5 X 418.50 = 8,579.3 |
| TOTALS | | 176.0 | | 65,259.1 |

Step 4: Divide the total (65,259.1) by the total tons purchased (176.0) to get the **Weighted Average Price Per Ton**:

$$\frac{65,259.1}{176.0} = \$370.79$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2009 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2008 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2009 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2008 are shown. (*Table 9 only appears in the Final Grape Crush Report.*)

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2009 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2008 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

Grape Variety Synonyms

Alicante Bouschet - Alicante
Beauty Seedless - Black Beauty
Black Corinth - Zante Currant
Black Prince - Rose of Peru
Red Blaufrankisch - Lemberger
Burger - Monbadon
Chardonnay - Pinot Chardonnay, Chardonnay Musque
Cinsaut - Black Malvoisie, Black Malvasia
Crimson Seedless - Red Crimson
Emerald Seedless - Black Seedless
Flame Seedless - Red Flame
Red Gamay (Napa) - Gamay, Valdiguer
White Gray Riesling - Trouseau Gris
Red Grenache - Grenache Noir
Italia - Muscat Italia

Malaga - White Malaga
Mataro - Mourvedre
Meunier - Pinot Meunier
Moscatillo - Muscat Yellow
Muscat Blanc - Muscat Canelli,
Muscat Blanc A Petits Grains
Muscat Hamburg - Black Muscat
Negrette - Pinot St. George
Nero D'Avola - Calabrese
Palomino - Golden Chasselas
Pinot Gris - Pinot Grigio
Princess - Melissa
Red Globe - Rose Itto
Red Refosco - Mondeuse
White Ribolla Gialla - Rebolla

Red Rubired - Tintoria
Ruby Seedless - King Ruby
Red Sangiovese - Sangioveseto, Brunello
White Sauvignon Vert - Muscadelle
White St. Emilion - Ugni Blanc, Trebbiano
Sugraone - (PROPRIETARY NAME WAS REMOVED)
Syrah - French Syrah, Shiraz, Syrah Noir
Tempranillo - Tinta Roniz, Valdepenas
Touriga Nacional - Touriga
Trouseau - Bastardo
Vermentino - Vennentino
White Riesling - Johannisberg Riesling, Riesling

TABLE 1: STATE TOTALS OF GRAPES FOR CRUSHING BY TYPE AND VARIETY
WEIGHTED AVERAGE DEGREES BRIN, AND WEIGHTED AVERAGE DOLLARS PER TON, 2008-09

| | Dollars | Code a/ | |

* Synonyms for variety names are shown on Page 5

a/ See code descriptions in Table 8 - Supplement: 2009 Brix Adjustment Factors

b/ Other categories include minor and mixed varieties

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price

e/ All prices based on per Degree Brix.

TABLE 8 - SUPPLEMENT: 2009 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2009 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2009 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2009 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOC), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

THANK YOU!

The California Office of USDA's National Agricultural Statistics Service (NASS) and the California Department of Food and Agriculture (CDFA) appreciate the timely reporting by the State's vintners in preparation of the *2010 Grape Crush Report*. This report is available online at:

www.nass.usda.gov/ca

List of Publications

NASS and CDFA also conduct an annual acreage survey in partnership with California grape growers. *The Grape Acreage Report* contains information on new plantings and removals of grapes. *The Grape Acreage Report* is available on the NASS website at:

www.nass.usda.gov/ca

List of Publications

GROWERS AND VINTNERS

***Please notify NASS of any crush report
corrections by February 18, 2011.***

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 2010 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 2011. The March 10, 2011 Final Grape Crush Report will contain any late reports or corrections to the preliminary report. **Please notify us of any corrections for the Final Grape Crush Report by February 18, 2011.**

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2010 crush totaled 3,980,229 tons, down 3 percent from the 2009 crush of 4,095,297 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 2,047,766 tons, down 1 percent from 2009. The 2010 white wine variety crush totaled 1,535,133 tons, down 6 percent from 2009. Tons crushed of raisin type varieties totaled 273,577, down 11 percent from 2009, and tons crushed of table type varieties totaled 123,753, up 46 percent from 2009. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2010 season, this total was 535,794 tons, approximately 13 percent of the 2010 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

The 2010 average price of all varieties was \$543.03, down 5 percent from 2009. Average prices for the 2010 crop by type were as follows: red wine grapes, \$625.19, down 7 percent from 2009; white wine grapes, \$500.37, down 7 percent from 2009; raisin grapes, \$209.32, up 22 percent; and table grapes, \$173.81, up 21 percent.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2010, Chardonnay accounted for the largest percentage of the total crush volume with 16.4 percent. Cabernet Sauvignon accounted for the second leading percentage of crush with 11.2 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties, with the exception of Thompson Seedless.

District 13, (Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)), had the largest share of the State's crush, at 1,362,782.3 tons. The average price per ton in District 13 was \$262.55.

Leading Varieties Crushed

PERCENT OF TOTAL 2010 CRUSH

Source: USDA, NASS, California Field Office

*Synonyms for variety names are shown on Page 5.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,243.66 per ton, down 5 percent from 2009. District 3 (Sonoma and Marin counties) received the second highest return of \$2,008.43, down 8 percent from 2009. The 2010 Chardonnay price of \$715.22 was down 6 percent from 2009, and the Cabernet Sauvignon price of \$1,024.86 was down 5 percent from 2009. The 2009 average price for Zinfandel was \$441.42, down 5 percent from 2009, while the Merlot average price was down 2 percent from 2009 at \$612.48 per ton.

GRAPE CRUSH, DOLLARS PER TON 2001 - 2010

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2010 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2009 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2010 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2009 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2010 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2009 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2010 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2009 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2010 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2009 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2010 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2009 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2011 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The next example indicates the method used for calculating weighted averages.

The following two purchases were made.

| Variety | District | Tons | Degrees Brix | Base Price | Price Paid Per Ton | Acceptable Brix Limits | Brix Adjustment Factors | Brix Adjustment Limits |
|--------------|----------|-------|--------------|------------|--------------------|------------------------|-------------------------|-------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | \$450.00 | \$364.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |
| Petite Sirah | 1 | 20.5 | 19.0 | \$450.00 | \$418.50 | 19 - 25 | + or - 10% | Base 22, Min 20, Max 24 |

Note: The variety, district, base price, and Brix Adjustment Factors (including Brix limits) are the same. The tons purchased, degrees Brix, and price paid per ton are the only differences in this example.

Step 1: Multiply the tons by the Brix for each lot purchased and then add the products to get the total. Also, add the tons purchased.

| Variety | District | Tons | Degrees Brix | Total (Tons X Brix) |
|---------------|----------|--------------|--------------|------------------------|
| Petite Sirah | 1 | 155.5 | 20.6 | 155.5 X 20.6 = 3,203.3 |
| Petite Sirah | 1 | 20.5 | 19.0 | 20.5 X 19.0 = 389.5 |
| TOTALS | | 176.0 | | 3,592.8 |

Step 2: Divide the total (3,592.8) by the total tons purchased (176.0) to get the **Weighted Average Degrees Brix**.

$$\frac{3,592.8}{176.0} = 20.4$$

Step 3: Multiply the purchased tons by the Price Paid Per Ton for each lot purchased and then add the products to get the total.

| Variety | District | Tons | Price Paid Per Ton | Total (Tons X Brix) |
|---------------------|----------|--------------|--------------------|----------------------------------|
| <i>Petite Sirah</i> | <i>1</i> | <i>155.5</i> | <i>\$364.50</i> | <i>155.5 X 364.50 = 56,679.8</i> |
| <i>Petite Sirah</i> | <i>1</i> | <i>20.5</i> | <i>\$418.50</i> | <i>20.5 X 418.50 = 8,579.3</i> |
| TOTALS | | 176.0 | | 65,259.1 |

Step 4: Divide the total (65,259.1) by the total tons purchased (176.0) to get the **Weighted Average Price Per Ton**:

$$\frac{65,259.1}{176.0} = \$370.79$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2010 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2009 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2010 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2009 are shown. *(Table 9 only appears in the Final Grape Crush Report.)*

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2010 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2009 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

Grape Variety Synonyms

Alicante Bouschet - Alicante
Beauty Seedless - Black Beauty
Black Corinth - Zante Current
Black Prince - Rose of Peru
Red Blaufraenkisch - Lemberger
Burger - Monbadon
Chardonnay - Pinot Chardonnay, Chardonnay Musque
Cinsaut - Black Malvoisie, Black Malvasia
Crimson Seedless - Red Crimson
Emerald Seedless - Black Seedless
Flame Seedless - Red Flame
Red Gamay (Napa) - Gamay, Valdiguie
White Gray Riesling - Trousseau Gris
Red Grenache - Grenache Noir
Italia - Muscat Italia

Malaga - White Malaga
Mataro - Mourvedre
Meunier - Pinot Meunier
Moscat Gaillo - Muscat Yellow
Muscat Blanc - Muscat Canelli,
Muscat Blanc A Petits Grains
Muscat Hamburg - Black Muscat
Negrette - Pinot St. George
Nero D'Avola - Calabrese
Palomino - Golden Chasselas
Pinot Gris - Pinot Grigio
Princess - Melissa
Red Globe - Rose Ito
Red Refosco - Mondeuse
White Ribolla Gialla - Rebolla

Red Rubired - Tintoria
Ruby Seedless - King Ruby
Red Sangiovese - Sangioveseto, Brunello
White Sauvignon Vert - Muscadelle
White St. Emilion - Ugni Blanc, Trebbiano
Sugraone - (PROPRIETARY NAME WAS REMOVED)
Syrah - French Syrah, Shiraz, Syrah Noir
Tempranillo - Tinta Roriz, Valdepenas
Touriga Nacional - Touriga
Trousseau - Bastardo
Vermentino - Vennettino
White Riesling - Johannisberg Riesling, Riesling

* Synonyms for variety names are shown on Page 5.

a/ See code descriptions in Table 8 - Supplement: 2010 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price.

e/ All prices based on per Degree Brix.

TABLE 8 - SUPPLEMENT: 2010 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 – SUPPLEMENT: 2010 BRIX ADJUSTMENT FACTORS

The following Brlix adjustment factors are on a per degree Brlix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brlix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brlix, such as material other than grapes (MOC), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2010 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOC), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

| Category | Code | Description | Category | Code | Description |
